## Projects

### Training Management System

- This system reduces the manual effort by offering a open portal for employee, manager and admin.
- A user can request himself/herself to participate in ongoing training or he is able to give training on a specific course.
- A manager is able view each employee and he will able approve or reject once request for their registered course.
- Admin is able to schedule a training session, venue, timings and he will notify everyone if there is any change.

### Build a serverless Text to Speech Application with [Amazon Polly](#)

- We have text box where we can enter a text and the text will be converted into audio format and it is stored and it gives a unique id.
  - Using the unique Id, we will be able to retrieve the audio file in future.
-
